Hi Ben,

Quick present for you before Christmas, I've just finished checking the last of your 29 samples and the results are attached. If you have any problems or questions, I'll be back at work straight after the Xmas break (2nd January 2007) and I'll be happy to help.

Merry Xmas and have a good (and safe) New Year

Claire

Hi Claire,

The samples are for the usual set of metals analysed by ICP-MS only. No need to worry about ICP-OES.

Cheers,

Ben

Hi Ben,

Are these samples for the usual set of metals analysed by ICP-MS or do you need the majors as well that are analysed for by ICP-OES (Fe, Na, K,

Mg, etc.)?

Hi Brad and Claire,

Attached is a spreadsheet that should hopefully have all the information you require.

A hard copy of this spreadsheet was also sent with the samples.

Cheers,

Ben

Hi Claire,

Ben Smith is has sent 29 samples across to you for ICP-MS analysis only.

Ben, could you send me as soon as possible (and copy to Claire) details of where these were collected (site names), the sample number/identifier list, the date of collection and any field chemistrt parameters measured. This information is required as part of QA/QC and sample tracking procedures.

Thanks

Brad

Hi Brad,

Package is on the way to Claire Wright at CSIRO Adelaide. Do you have Claire's email address by chance?

Cheers,

Ben

I realised last night what you meant in your earlier message. If the bottles already had a bit on conc Nitric added (by CCWA) prior to adding the filtered sample, then there's no need to add more. The samples can be sent direct to CSIRO Adelaide,
Cheers

Brad
