

Indian Tropical Islands 3 Sub-region

Statistics and maps produced by GIS Branch, Department of Parks and Wildlife (2014)

Information on the methods used to generate the statistics is available [here](#).

Note:

- The analysis was undertaken in 2012 under the auspices of the Department of Environment and Conservation. Therefore the acronym of “DEC” is used in this document.
- **Many of the spatial datasets required for this analysis do not have coverage over the Indian Tropical Islands 3 sub-region. Only tenure, mining and petroleum spatial data is available. Therefore only these tables are presented.**

PROFILE OF SUB-REGION

Total area of sub-region (ha)

Size of sub-region in WA (ha)	Percentage of WA covered by sub-region (%)	Percentage of sub-region within WA (%)	Percentage of sub-region covered by intact habitat* (%)	Percentage of sub-region within DEC-managed conservation reserves (IUCN Ia - IV) (%)
16	< 0.01	< 1	No data	100.00

*No remnant vegetation or other datasets related to habitat are available. Hence this is reported as “No data”. Note that the nearly the entire island is an IUCN Ia Nature Reserve. The remaining small area is a 5(1)(h) reserve (IUCN VI).

Total			16	16	-	100	100	-	1	2	-

NB: some rounding errors may occur.

* Aboriginal Lands Trust data are only available for 2012. The extents shown are a subset of the category they sit below. These values should therefore not be summed since they are not mutually exclusive.

^ In 2002, there is not data to differentiate other leasehold lands. Therefore it is likely that the total extent shown for pastoral leases in 2002 includes both pastoral leases and other leasehold lands.

† The attributing of the state cadastral database has improved considerably over time. Therefore much of the land which had no tenure category assigned in 2002 will have been attributed and consequently distributed between other reporting categories in 2012. Much of this is expected to be distributed to the "Other public lands (roads and water bodies)" category, as road casings are progressively digitised and attributed, though increases in other categories is also possible as attributing improves.

	Mining (live) tenements and petroleum (active) titles*	0	0.00	0	0.00	0.00	0	0	0	0	0	0	0	0	0	0	0	0

Note: When assessed in 2012, petroleum titles were within the vicinity of the island but there were none over the island/sub-region.

*An area of land can have over it both a mining tenement and petroleum title. The combined total represents the land area which is covered by a mining tenement or petroleum title or both.

^For the Land Area "Change" is calculated as the difference in % coverage at the IBRA sub-region scale of the two year dates.
